

## EnOcean Starter Kit 1 & 2

**EnOcean Starter Kit is the perfect plug&play package for the building industry. The battery-free switches and sensors simplify sustainable green building development by replacing system wires with self-powered wireless links. The EnOcean Starter Kits is offered in two variants.**

### **Starter Kit 1: PTM 250 + RCM 250**

Starter Kit 1 is used for switching light or other electronic loads.

easyfit universal wall transmitter PTM 250 with white sample frame:

- Surface attachment without case
- Switch frame flat on wall
- Compatible with various designs of BERKER, GIRA, JUNG and MERTEN with 55 x 55 mm rocker

Universal single-channel relay switch (230 V) RCM 250:

- for Flush Mounting
- Maximum load: 1100VA resistive

### **Starter Kit 2: STM 250 + RCM 250**

Starter Kit 2 is used for monitoring windows and doors.

easyfit magnet contact radio module STM 250:

- Solar driven
- Several days of operation in total darkness
- Periodic life signals
- Sensor mountable to all frame profiles

Universal single-channel relay switch (230 V) RCM 250:

- for Flush Mounting
- Maximum load: 1100VA resistive

Starter Kit 1

Starter Kit 2

### **Energy Harvesting made easy with EnOcean wireless standard**

EnOcean Starter Kit is a energy harvesting wireless product kit for maintenance-free sensor solutions based on the EnOcean wireless standard.
